GenAI SW Catalogue

Chat Q & A Solution
Intel® AI for Enterprise RAG Chat Q&A builds upon the strong foundation of OPEA. It extends this base with key features that enhance security, scalability, performance and user experience.

Content Summarization Solution
Intel® AI for Enterprise RAG Document Summarization solution builds upon the strong foundation of OPEA. Summarizes large documents or datasets, providing concise and relevant insights quickly.

Audio Q & A Solution
Intel® AI for Enterprise RAG AudioQnA solution builds upon the strong foundation of OPEA. Enables seamless voice-based interactions, allowing large language models (LLMs) to engage in dynamic conversations with users.

Inference as a Service
Intel® AI for Enterprise Inference is aimed to streamline and enhance the deployment and management of AI inference services on Intel hardware.

Code Translation
Automates code translation from one programming language to another to help maintain code efficiency and reduce human error in an enterprise setting.

Code Generation Solution
A specialized AI model designed to generate high-quality computer code, accelerating the development process with greater efficiency.

Visual Q & A Solution
Answers open-ended questions by interpreting visual data, allowing AI to understand and respond to queries about images.

FAQ Generation Solution
Generates frequently asked questions (FAQs) from various data types with optimized performance, security and scalability for thousands of users.

MLPerf v5.1 Inference
Solution enables to run Intel MLPerf v5.1 with Intel optimized Docker images and scripts.

OpenVINO Whisper-asr-genai 執行結果

The screenshot displays the OpenVINO Generate API Whisper demo interface. It includes an 'Audio input' section with a 'Record' button and a 'Upload' button. A red arrow points from the 'Upload' button to a waveform visualization labeled '1. 上傳音檔 或 直接錄音 1.' (Upload audio file or record directly 1.). Another red arrow points from the 'Record' button to the same waveform. Below the audio input, there are tabs for 'Transcribe' and 'Translate'. A red arrow points from the 'Transcribe' tab to a section labeled '2. 聲音轉換耗時' (Voice conversion time) and '文字輸出結果' (Text output result). This section shows a '3.04' value for 'OpenVINO Whisper Generation Time (s)' and a sample text output. A red arrow points from the 'Translate' tab to a section labeled '3. 文字翻譯' (Text translation). Below the main interface, there is a table with 'Audio input' and 'Language.' columns, showing examples like 'en_example.wav' and 'ml_example.wav'. A red arrow points from the 'Audio input' column to a section labeled '1. 聲音樣本' (Audio sample). At the bottom right, the text 'OmniXRI整理製作, 2025/03/24' is displayed.

OpenVINO Generate API Whisper demo

OpenVINO Notebooks – Text Generation(LLM)

The screenshot shows the OpenVINO Notebooks web interface. On the left, there's a sidebar with 'Categories' (AI Tasks, Ecosystem) and a search bar 'Filter AI Tasks by name'. Under 'Multimodal', various task filters are listed: Text-to-Image, Image-to-Text, Text-to-Video, Video-to-Text, Text-to-Audio, Text-to-Speech, Audio-to-Video, Visual Question Answering, Image Captioning, Feature Extraction, Text-to-Image Retrieval, Image-to-Text Retrieval, Image-to-Video, and Lip-Sync. The main area shows a list of notebooks under the 'AI Tasks' filter. The first notebook is 'Visual-language assistant with MiniCPM-V 4.6 and OpenVINO', which includes model demos for Visual Question Answering, Image-to-Text, and Text Generation. The second is 'Hunyuan Machine Translation with OpenVINO', featuring Model Demos, Text Generation, and Translation. The third is 'Visual-language assistant with Gemma 4 and OpenVINO', also including Visual Question Answering, Image-to-Text, and Text Generation. Each notebook entry has a 'View on GitHub' button, a 'Show Status' button, and a link icon.

DeepSeek-R1-Distill-Qwen-7B	14.1 GB	4.16 GB
DeepSeek-R1-Distill-Qwen-14B	27.5 GB	7.81 GB

OpenVINO – DeepSeek R1 執行結果

The screenshot displays the OpenVINO DeepSeek-R1-Distill-Llama-8B Chatbot interface. The chat window shows a conversation about explaining gravity to a 5-year-old child. The chatbot's response is detailed and uses simple analogies like magnets and balls. Below the chat window, there are buttons for 'Submit', 'Clear', and 'Advanced Options'. The 'Advanced Options' section is expanded, showing various parameters like Temperature, Top-p, Top-k, Repetition Penalty, and Max new tokens.

OpenVINO Whisper Result

Mr. Quilter is the apostle of the middle classes, and we are glad to welcome his gospel. Nor is Mr. Quilter's manner less interesting than his matter. He tells us that at this festive season of the year, with Christmas and roast beef looming before us, smiles drawn from eating and its results occur most readily to the mind. He has grave doubts whether Sir Frederick Layton's work is really Greek after all, and can discover in it but little of rocky Ithaca. Linnell's pictures are a sort of Up Guards and Atom paintings, and Mason's exquisite idles are as national as a jingle poem. Mr. Birkitt Foster's landscapes smile at one much in the same way that Mr. Carker used to flash his teeth. And Mr. John Collier gives his sitter a cheerful slap on the back, before he says, like a shampoo We're in a Turkish bath.

撰寫一篇關於「人工智慧和 OpenVINO 的優勢」的 100 字部落格文章

I am thinking...

這，用戶让我写一篇关于「人工智慧和OpenVINO的優勢」的100字部落格文章。首先，我得理解什麼是 OpenVINO，它是一個由Intel開工的人工智慧加速平台，我應該強調它在效能、效率和可擴展性方面的優勢。接下來，考慮用戶可能的需求，他們可能是在技術領域工作，或者對AI感興趣，所以我需要清楚地說明 OpenVino的好處，比如支持多種模型、跨平台兼容性等。

然後，我要確保文章結構清晰，分點闡述，這樣讀者容易理解。最後，用簡潔有力的語言，把這些信息濃縮到 100字以內。

I think I know the answer

人工智慧與OpenVINO相輔相成，憑借其高效的計算能力和靈活的部署方案，為AI應用注入新活力。OpenVINO（Open Visual Inference and Neural Network Optimization）通過優化模型壓縮和量化技術，大幅降低推理延遲，同時提升精度，滿足即時響應需求。此外，其支持多種深度學習框架和硬件加速模式，使其成為企業級AI解決方案的理想選擇。

OpenVINO MeloTTS 實驗結果

The screenshot shows the OpenVINO MeloTTS web interface. On the left, the input section is titled "輸入待發音的文字 (可中英文混用)". It contains a text input field with the placeholder "請輸入文字內容如何使用 Intel AI PC 及 OpenVINO 實現虛擬主播", a checked checkbox for "Use_OpenCV", a speed slider labeled "語速(%)" ranging from 50% to 200% (currently at 100%), and "Clear" and "Submit" buttons. A red arrow points from the "Submit" button to the label "生成語音". On the right, the output section is titled "顯示轉換耗時(ms)". It shows a text box with "MeloTTS 文字轉語音共花費: 1658.79 ms". Below this is an audio player labeled "輸出結果" showing a waveform and a duration of 0:00 to 0:05. A red arrow points from the audio player to the label "播放語音檔". Another red arrow points from the "Flag" button below the audio player to the label "調整語速(50% ~ 200%)".

OpenVINO 虛擬主播測試結果

The screenshot displays the OpenVINO web interface for creating a virtual host. The interface is divided into several sections:

- 1. 輸入待發音文字**: A text input field containing the text "如何使用 Intel AI PC 及 OpenVINO 實現虛擬主播".
- 2. 調整語速**: A slider control for adjusting the speech rate, currently set at 100%.
- 3. 生成語音**: A section showing the generated audio waveform and a "生成語音" button.
- 4. 載入預設影片樣本及生成之語音檔，亦可手動上傳或透過網路攝影機錄影、錄音。**: A section for loading video samples, with a "載入樣本" button.
- 5. 生成對嘴影片**: A section showing the generated video with the virtual host's mouth synchronized with the audio.
- 6. 播放生成之影片**: A section showing the video player controls for the generated video.
- 7. 下載生成之影片**: A section showing the download button for the generated video.

Output image archive (automatic lip sync)
